

## TODAY'S TOPIC: Airline Apps

**If you know how to use the airline apps on your phone, disregard this information.**

**If you don't have your airline app(s) on your phone, follow along Contact Debbie if you need help.**

1. Once you have decided on and booked a flight, go to that airline's mileage program and be sure you are signed up to earn miles. Your mileage program # must be in your itinerary. You can add it through the app or by calling. We fly a long way and you should earn miles for these trips.
2. Download the airline app(s) to your phone, set up a login, and be sure your trip is loaded in the My Trips, Find a Flight, Find Trip, My United (or similar) section. You may need to input the booking or confirmation # from your flight booking.
3. If you haven't already done so, you can select your SEATS from the app easily. I check the app often and adjust my seats as I find ones I prefer. You can also upgrade your seats (recommend higher than basic economy) and/or pre-pay for BAGS (recommend this for Aegean for Greece to Israel).
4. Your airline will have a section to Prepare for Travel. Be sure your passport # and all other required information is provided. You will probably not be able to check in online but will need to show your passport at the airport on travel day.
5. The app will notify you via text or email (you set that; I suggest text) if your flight changes or if you they have updates.
6. Each traveler is responsible for being ready to fly. If you have questions, please ask. **I'm happy to help!**

These updates are posted in the Registered Travelers section of our website.
